

# HUSKY HUNTER 16

HUSKY

### DYNAMIC LINK FOR YOUR INFORMATION SYSTEMS

Husky Computers uses the latest technologies to bring the power of your information systems to the people on the front lines of your business. The Husky Hunter 16 and Hunter 16/80 put the power of a desktop PC in the palm of their hands.

This, in turn, gives you access to the latest possible information about your business, whether it's service, distribution, manufacturing, or government. Husky computers can link the key field functions of your business into your central information system. This leads to better informed decision making, and elimination of costly paperwork and keypunching.

### VERSATILE, WATERPROOF AND RUGGED

The Husky Hunter 16 and 16/80 are small and lightweight, yet powerful, rugged and fast. A standard system can have up to 8 Mb of RAM packed within its tough, sealed, shockproof case. The MS-DOS operating system eases and shortens system development time, and lets you communicate or share data with industry standard computers and peripherals.

Uses for the Husky Hunter family include:

- data entry, access, and retrieval
- traffic and field service dispatch
- inventory and sales order entry

by service engineers, inspectors, sales forces, surveyors, manufacturers, healthcare professionals, and government personnel.

The potential applications are limited only by your needs, as Husky Computers has a long history of technological development and innovation to meet customer requirements.

Please call for Husky product information so that we can show you how other companies have benefited.

#### PROCESSOR

Type 16 Bit 8088 Instruction Superset  
Clock Speed 8 MHz.

#### PROGRAMMING

Operating Sys MS-DOS 3.3 & Utilities in ROM  
Languages Most standard PC languages supported, GWBASIC in ROM

#### COMMUNICATIONS

Ports 2 Asynchronous RS232C/V.24:  
• 25 pin D-type connector  
• 5 pin (3 wire plus CTS)  
Baud Rate Both ports 150 to 38400 Baud.  
Modem Support for Landline or RF

#### SCREEN on Hunter 16

240 x 64 pixel full graphic LCD.  
CGA Compatible.  
Text Mode User selectable 8 lines of 40 chars. (or 10 x 60 or 8 x 30) forms a window into a virtual screen of 25 lines of 80 chars.  
Graphics Text & Graphics mixed freely

#### SCREEN on Hunter 16/80

640 x 200 pixel full graphic LCD  
CGA Compatible.  
Text Mode 80 characters by 25 lines  
Screen may be switched to double height mode

#### PHYSICAL SPECIFICATIONS

Size 8.6" x 6.2" x 1.4"  
Weight 2.7 - 2.9 lbs  
Sealing Waterproof against accidental immersion  
Backlight Electroluminescent, adjustable  
Keyboard Programmable standard QWERTY plus numeric keypad  
Temp Range -10° to 55° C  
Case Die Cast Aluminum Alloy Sealed & Shockproof

#### MEMORY

Types Low power CMOS RAM & EPROM  
RAM 1 to 8 Mb Total for Hunter 16  
1 to 7 MB Total for Hunter 16/80  
Includes: 128 K to 640 K DOS workspace or expandable using EMS, remainder used as RAM disk 1024 K max, incl. MS-DOS Oper. System, MS-DOS Utilities & optional 128 K Flash EPROM  
ROM

#### BATTERIES

Type Alkaline or optional NiCd rechargeable - 4 "AA"  
Charge Life 30 Hours operating typical for Hunter 16; 20 Hours for Hunter 16/80 (Alkaline)  
Recharge Time NiCds - up to 5 hours  
Power Monitor Software & user accessible remaining power percentage  
RAM Backup Automatic minimum 1 month at ambient temperature

#### ACCESSORIES

The Hunter 16 and 16/80 are compatible with all standard RS232C peripherals plus those listed below:

DC Charger Cable for in-vehicle charging.  
RAM Cartridge Rugged, self-contained 256 K storage module w/RS232C interface. 2.9"x2.9"x0.8" 2.5 oz Supports a range of readers and symbologies  
Bar Code Battery powered 24 or 42 col., attaches to Hunter 16
